## Attention Ratepayers

At a recent meeting of the councillors of the Municipal District of Harmony, Dr. E. H. Freeze was present, and requested that he be paid bonus for services rendered to the ratepayers of the Municipality. The councillors refused to pass on the question and appointed a committee, consisting of A. Miller, reeve, E. Griffin and O. B. Roe to investigate the matter.

A meeting for the discussion of this issue will be called on an early date and it is hoped that the ratepayers will give the matter their close consideration and attend any called meeting. It is easy to find fault with municipal bodies, when no defense is possible, but it will take a great deal of this sort of criticism to get anywhere if the meeting called for the purpose of discussion of this issue is avoided. Present conditions should result in more attention being paid to municipal taxes, which are direct and in consequence may be easily analyzed.

## Relates Experiences in the Cariboo

Art. Anderson of Calgary was a Champion visitor Wednesday. Mr. Anderson related some very interesting experiences, resulting from the trip he and Mrs. Anderson recently took into the Cariboo country. After motoring as far as possible, they packed into the mountains for several miles, doubling back for their canoe and supplies. On arriving at their destination they spent several days fishing; with wonderful results. They were fortunate in coming in contact with several moose, and enjoyed the experience immensely, not realizing the danger. They also panned some gold and returned with a fair showing of the mineral. Mr. and Mrs. Anderson both enjoyed the trip to the utmost.

## 5000 Mile Trip

Mr. and Mrs. C. Johnson arrived in Champion Saturday after completing a 5,000 mile trip. Commencing at Montreal their route took them through the states of New York, Pennsylvania, Ohio, Indiana, Illinois, Missouri, Oklahoma, Colorado, Wyoming and Montana. Stops were made in O.P., Illinois, Oklahoma, and Yellowstone. They expect to return by the northern route stopping a few days in Chicago where they will attend the Century of Progress.

Mr. and Mrs. Johnson spoke highly of their new location and in their fifteen months residence in St. Angelo have learned to speak the french language quite efficiently.

K. R. McLean, R.O. of McLean & Anderson, Right Specialist of 224-24th Ave West, Calgary, will make his monthly visit to Champion, Friday, Sept. 28th at the Drug Store.

## Local & General

Fred Smith of Cardston was a Champion visitor this week.

Mr. and Mrs. A. Baker were Lethbridge visitors Saturday.

Lost—Black Kid Glove on Vulcan high-way. Phone 44 or leave at Chronicle office.

Mr. and Mrs. J. Long and family are Calgary visitors this week.

Several from town took in the showing of "Tog-Boat Annie" at Lethbridge last week.

Mrs. Williamson was a week end guest at the home of Mr. and Mrs. J. C. Anderson.

House and Street Dresses, all to be sold at 25% discount at Campbell's.

Mrs. Pugsley and Dr. Freeze were Pincher Creek visitors over the week end.

R. Harper, Traffic Superintendent for the A. G. T., visited the local exchango this week.

Mr. Purcell and family have taken up residence in the house formerly occupied by R. I. Baker.

MacIntosh Apples, and is the Face Red. 6 lbs. for 25c at Campbell's.

Mrs. Lawrence, who has spent the past few months in England, returned to her home this week.

Mrs. Collins entertained at dinner recently, when her guests included Mrs. Williamson and Miss Cameron.

Prosperity—with Marie Dressler and Polly Moran. Another big hit coming to your theatre Wed., Oct. 4.

Mrs. Boushier returned to Champion Wednesday after spending a few days in Calgary.

Noble Pendergrast of Nobleford was a recent visitor at the home of Mr. and Mrs. C. Lucia.

Morley Hayes, who has spent the past two months in this district, left for his home in Calgary on Sunday.

Andrew Anderson leaves Tuesday for Edmonton where he will complete his course in pharmacy at the University of Alberta.

"Run and Butter Toffee." Very little butter. Special, 25c per lb. at Campbell's.

Mr. and Mrs. Orvil Smith will reside on Mrs. U. D. Smith's farm during her absence in California.

Mrs. A. Nelson had as her dinner guests on Sunday, Miss Mary Zaag, Miss Clara Newton and Mr. Clarence Robinson of Vulcan.

Meet "Blue Boy" this Friday night at State Fair. Will Rogers and Janet Gaynor will entertain you as never before. Don't forget, show starts at 8 o'clock, regular prices.

Allan Graham, of the Canadian Bank of Commerce staff, has been transferred to Red Deer and leaves for that point this week. Gordon Fox of Glencliff will take his position here.

## Marvel Of Spider's Web

Perfect Piece of Engineering And Strength Is Remarkable

There are few things more beautiful and symmetrical than the "cart-wheel" web found in the garden, spun from the 130 spinnerets which the garden spider carries at the hinder extremity of the abdomen. It is a marvel of engineering perfect on which never miscare.

The radiating "guy ropes" are first made secure, and these form the foundation of the exquisite pattern of whorls which form the web. The strength of the web is amazing, generally resisting the desperate struggles of the biggest blue-bottle or the fattest moth! The silk of some tropic species will even hold small birds.

The cobwebs which are the base of the housewife are mainly the debris of the funnel-shaped webs of the common house spider. These traps are much denser and more untidy-looking than the garden spider's wonderful creation.

There is a little spider which is a great aviator. Naturalists tell us that the upper regions of the air are sometimes filled with millions of migrating spiders, borne through the air on filaments of silk. Usually these spiders take off in vast numbers from grass stems and, when the wind is blowing, simply land in the threads and sink to earth.

But the common water spider is perhaps the most ingenious of all. It is for anticipated the diving bell and the "bathysphere." The simple experiment of pressing an air bubble into water demonstrates the fact that the imprisoned air effectively prevents the entrance of a single drop and leaves the inside of the glass dry. That is the principle of the diving-bell.

The water spider actually spins a gillion envelope around submerged plants and inflates the nest with air. The bell is constructed so that its mouth points downwards, and the air-filled chamber the female deposits her eggs. Should the air of the nursery become foul, some of it is released by lifting one edge of the bell mouth.

## Overseas Bacon Trade

Alberta Laying Plans To Develop More Business

More business for Alberta from the overseas bacon trade is aimed at in a new policy about to be put into operation under the direction of the provincial department of agriculture. An aggressive campaign is to be conducted for improvement in quality of hogs produced in the province, one of the chief features of the plan being a bar-boning scheme, under which small bonuses will be paid to purchasers of approved hogs.

Hon. George Hoadley, Minister of Agriculture, in announcing the new policy, says that it will be operated jointly with the Federal Department of Agriculture and the Federal film, railways, packing companies and stockyards will co-operate on the full campaign.

## Research Expedition

Swedish Geologist To Study Formations In Antipodes

A well-known Swedish geologist, Dr. Carl Cederlund, has been commissioned to undertake a most interesting research expedition to Australia and New Zealand. Dr. Cederlund is the foremost pupil of the famous Swedish geologist, Prof. De Geer, and will apply the De Geer research method to the geological formations of New Zealand and Australia. Dr. Cederlund's expedition will investigate a highly interesting formation near Christ Church in New Zealand, where no less than some 13,000 sedimentary year strata can be seen and measured.

## Earned His Name

Yorks attracted swarms at Lynbrook, N.Y., to a crevice between two buildings. They found a dog—very small and very frightened—wedged fast. For three hours they worked and finally got him free. No one in the crowd of onlookers stepped forward to claim him so the farmer said, "I guess he belongs to me now, and from now on his name will be Squeeze."

## Predict Severe Winter

Wild geese gathering in flocks and flying south, two months earlier than last year, letoken an unusually early and severe winter, according to old-timers in the vicinity of Grimshaw, Alta. One farmer also reports squirrels on his farm have been extremely busy recently laying in winter supplies.

"It pays to be nice to the people you meet on the way up, for they are the same people you meet on the way down."

W. N. U. 2014

## PASSING OF ARABIAN MONARCH SHOCKS THE EAST

The sudden death, from heart trouble, of King Feisal, of Iraq, while in Switzerland, was a great shock to his subjects and also to Europe. This summer the scholarly King left his capital, Bagdad, and paid a visit to several of the European capitals, including London, where he was a guest of King George. He had interrupted a course of treatment at Berne to travel to London for a conference in connection with the Assyrian troubles in his country, and was on his way home. Only 48 years of age, King Feisal was one of the most romantic figures in the East, and during the war became famous for his battles against the Turks in Arabia. The picture at the left shows him when he quipped the first rail bridge to cross the great river Euphrates and which forms a new and better gate to the West. At the right King Feisal is being greeted by King George on his arrival in London recently. The Duke of York can be seen behind the Arabian Monarch.

## Young Calves Require Milk

Farmers Have Found Animals Cannot Thrive Without It

Calves, according to the best authorities, should have new milk or whole milk until they are from two to four weeks of age; after that it is advisable—almost necessary—that they have skim-milk until they are three months of age. It can then be discontinued if the calves are consuming a good grain ration and getting a good grade of legume hay. Should one not have enough skim-milk for at least ten pounds daily per calf, it would probably be advisable to secure some skim-milk powder to place out of the fresh-milk milk. Mix one pound of powder to nine pounds of water. Feed this skim-milk at about the rate of 12 to 15 pounds daily with a grain ration of four parts cornmeal to two parts ground oats and one part bran. Start the calves on the grain as soon as they will eat it. It should be fed with a good legume hay.

If the calves are doing well, the skim-milk can be reduced to about one-half when the calves are two and one-half months of age and discontinued entirely at three to four months, when they should be taking somewhere between two and four pounds of grain daily. With plenty of good legume hay, this grain ration will not need to be increased as the calves grow older.

Buttermilk powder can be used in exactly the same way, with approximately the same results, although the calves will have to become accustomed to it rather slowly, or it may cause a little scouring.

## Make More Creamery Butter

Saskatchewan Output Higher Than For August Last Year

The output of creamery butter in Saskatchewan for the month of August amounts to 2,627,738 pounds, which is an increase of 74,030 pounds or 2.8 per cent. over the output for the corresponding month of 1932. The output of the current month is the highest ever reported for August in the history of the province.

A total of 12,117,302 pounds of creamery butter have been manufactured during the first eight months of 1933 compared with 12,463,412 pounds in the same months of 1932, the increase amounting to 12.3 per cent.

## Action Against University

Action against the University of Alberta governors by seven residents of England, who claim the \$30,000 estate left by the late Henry Strachan, of Del Bonita, Alta., will go to trial in Lethbridge at the Alberta supreme court's first sitting in 1934, according to an order granted by Mr. Justice T. Tweedie.

last two fiscal years.

Czecho-Slovakia exports recently have been the lowest in the history of the republic.

Nemesis was the Greek goddess of retribution.

## Britain Is Healthy

General Health Better Now Than At Any Time In History

Sir George Newman, chief medical officer of the Ministry of Health, finds British healthier now than at any time in her history. Unemployment has not resulted in any general increase in sickness and the death rate in areas hit most by the depression actually has been reduced.

The birth rate in 1932 was the lowest ever recorded, but better care of newborn babies has resulted in the saving of an average of 40,000 infant lives annually.

"If a halt is not called in indiscriminate dosing of foods with vitamins, there is a possibility of disturbance in the balance of nutrition which may have far-reaching effects and which it is not unreasonable to contemplate with some uneasiness," the medical officer continues.

## Not Providing For Future

Pitcairn Islanders Believe End Of World Is Nigh

The end of the world is in sight, according to the inhabitants of Pitcairn Island, Southern Pacific Ocean, and they are making no provisions for the future. They are not planting young coconuts, this year, nor storing up anything for the future. The 60 people on the island are the descendants of English sailors who mutinied on H.M.S. Bounty in 1790, and Tahitian women.

## Such Kindness

"He stared at me," she complained, "He had red hair and bushy eyebrows and a gray felt hat and a mole on his chin, and a brown suit and a gray tie. And he looked at me as if he wanted to take in everything I wore—the rude fellow."

He: "Yes, I'm a traveling man." She: "Good! Let's see how you do."

France has a new law strengthening its insurance companies.

## Preparing New Craft To Salvage Treasure

Inventor Hopes To Reach Sunk "Lustania" In Baby Submarine

Simon Lake, submarine inventor, of Bridgeport, Conn., is making preparations for an expedition that had for its ultimate goal an attempt to reach the fabulous sunken treasure of the "Lustania."

The baby submarine "Explorer," never launched, was built as a tender, the ship "Normana," were being made ready at the old government shipyards on the Houston River.

Lake said the expedition planned to explore the waters of the Atlantic and Caribbean, in the baby sub, recovering sponges and pearls at depths hitherto impossible to divers, before turning to the "Lustania."

Although no definite date was set for the start of the expedition, the feverish activity pointed to an early departure.

Lake said the expedition would go first to the Bahama Islands for sponge fishing, with a side voyage to Tarpon Springs, Fla., for the same purpose.

The expedition then will try to salvage the sunken treasure from the baby submarine along the Atlantic Coast, Lake said, before making its supreme effort to retrieve a fortune, reputed to be \$1,000,000, from the treasure room of the "Lustania," off the Irish Coast.

## Chinese Lose Millions

Huge Fund Raised To Resist Japanese Invasion Disappears

A scandal involving millions of dollars raised for a "war chest" to finance the defense of Manchuria against Japanese invasion two years ago was ordered investigated by the government authorities.

Chinese heroes who fought and died—and ultimately fell—are wondering why they happened to meet 20,000,000 silver, the equivalent of \$5,250,000 in Canadian currency.

The extent of the scandal was revealed with the return to China of General Ma Chan-shan, hero of the recent river battle in Manchuria, who finally was forced to flee to Soviet Russia and came back by way of Europe.

On his return, General Ma was acclaimed a national hero and named a member of the National Military Council. He soon resigned, however, and from retirement let it be known that the \$20,000,000 Chinese currency raised by voluntary subscription to carry on the fight against Japan, he and his associates got only \$17,130,000.

## Producing More Butter

Creamery Butter Production Increases By Nearly 2,000,000 Pounds

An increase of almost 2,000,000 pounds was shown in creamery butter produced in August when the amount was 27,670,054 pounds as compared with 25,672,000 pounds in the corresponding month last year, says a report issued by the Dominion Bureau of Statistics.

Quebec led in production with 8,800,437 pounds; Ontario second with 8,623,129 pounds and Alberta third with 2,407,000 pounds. Production in other provinces was as follows: Manitoba, 2,072,816 pounds; Saskatchewan, 1,885,708; Nova Scotia, 662,982; British Columbia, 459,792; New Brunswick, 426,828; and Prince Edward Island, 354,000 pounds.

## Canada Beats Previous Records

Wheat, Tobacco And Plum Exports To British Isles Higher In 1932

In 1932 Canada beat three of her previous records for exports to the British Isles, viz., wheat, 46,874,000 cwts., against a record of 41,063,000 cwts. in 1928; tobacco, 10,844,000 pounds against 6,773,000 pounds in 1931; plums, 20,000 cwts., against 18,000 cwts. in 1928. No only did Canada beat these records, she also set a record for supplies going to the British Isles from Canada, but the 1932 total has never been exceeded by any country except during the war years of 1916 and 1917.—Marketing, Toronto.

## Trans-Canada Highway

Coast-To-Coast Motor Road Ready To Open Within A Year

Canada will likely have a coast-to-coast motor highway by this time next year if the present plans of the Canadian government work out. It will involve the use of lake steamers to bridge one gap of some 300 miles, but within the long-mooted Trans-Canada Highway will not be an actual fact. It will be possible for a motorist to travel from Halifax to Vancouver without leaving Canadian territory.

Italy had more tourists this year than last, but they were not as liberal spenders as those of other nations.

## An Effective Lightning Rod

New York's Empire State Building Is Good Safeguard

The Empire State building in New York city is the tallest, most elaborate and most successful lightning rod ever erected by man. Time and time again it has been struck. In fact, hardly a thunderstorm sweeps over New York without striking it. It does not singlet it out to hurt a bolt at its towering mooring mast. No one in the building is aware that flashes which may have a potential of 10,000,000 volts at times are drawn to the mast, only to be dissipated by the intricate steel structure into the ground.

Once some electrical apparatus connected with a weather vane on top of the building was fused, but probably after the safest of all places in New York city during a thunderstorm is an office in the tallest of steel structures.

It has been known ever since Franklin's time that an electric spark—and lightning is nothing but a huge spark—picks out the tallest of two points presented to it. So it is with the Empire State building. Its enormous steel frame protects not only itself but all the buildings near by. A piece of stone may be knocked off the building and sent hurtling toward points. With the stepped-back construction this entails no great danger. The stone falls on a terrace. Even if it struck the street the odds are many thousands to one against its killing any one for the simple reason that everybody rushes for cover during a storm.

Experiments which were made by Faraday and later by Sir Oliver Lodge proved conclusively that the best of all safeguards is not a lightning rod (although that has its merits when it is properly installed), but a cage. And a cage is exactly what the steel frame and plumbing system of a skyscraper is. The energy of the lightning is divided and subdivided, something that a cage does very effectively. A battlement or a transatlantic liner—in fact, any steel ship—must also find a place for safety during a thunderstorm, provided you keep away from the metal hull.—Toronto Telegram.

## "Lucky Seven" Explained

Ancients Had Reason For Thinking It Symbol Of Good Fortune

Every number, according to the ancients, had special qualities—just as each number had a sign, the odd numbers feminine. Seven owed its place as the symbol of good fortune, not to any quality of the number as such, but because it consisted of three and four and possessed the merits of both. Three as important because it consisted of one, which stood for man, and so was the symbol of life. Four was the number sacred to Jupiter, king of the gods, and the symbol of order. Seven, therefore, contained all the spiritual importance of three and all the material importance of four, and any matter in which that number entered could not but be fortunate! Especially lucky and gifted, of course, is a seventh child, while the number of a seventh child is blessed by the gods themselves! Incidentally, the number is mentioned more than 300 times in matters of importance in the Scriptures.

## Holland Wants New Flag

Thinks National Colors Should Be Orange, White And Blue

Holland will have a new national flag if a movement to that end is successful. Those advocating the change say the present red, white and blue should be altered to orange, white and blue. Red has appeared in the Dutch flag for 300 years, but many Dutchmen say it was substituted because orange, white and blue were the colors of Prince William of Orange, founder of the present dynasty, whose tenacity has just been celebrated.

## Test Resistance To Disease

Resistance to disease is now being gauged by a chemical color test. In Paris, a small amount of saliva is put into a test tube with other ingredients. The resulting colors range from near transparency to deep violet. Under a X-ray, the clear liquid or pale rose would denote health, while orange, lemon or other shades would indicate various illnesses.

## Really No Change

Princeton University's new theatre will permit the entire audience to see and hear equally. But, says the New York Times, to avert a complete break with the past, people will still be able to crawl over their neighbors' knees by buying seats away from the aisle and coming in late.

London has a flood of counterfeit coins.

## FANCIFUL FABLES

## Unjustified Pessimism Is Chief Trouble of Wheat Market, In Opinion of Western Economist

Unjustified pessimism is the chief immediate trouble of the wheat market, according to Dr. W. W. Swanson, head of the Department of Economics in the University of Saskatchewan who was in Montreal.

The importing countries of Europe have not yet reached their pre-war average in wheat, Dr. Swanson claimed, and have considerably reduced their growing of rye. The lessening of imports in Europe was due to no increase in acreage, but to extremely high yields this year and last year. This, he suggested, could not be taken as a permanent factor.

Dr. Swanson drew attention to the statement of B. W. Snow, American statistical, that current United States government estimates of wheat stocks in that country were about 156,000,000 bushels too high and that there was actually no surplus wheat there in excess of domestic requirements and a small carry-over for safety.

As to the "blue eagle" campaign in the United States, Dr. Swanson declared himself more than ready to pay for quality produce and as he has the final say as to what he shall buy, his wants must be considered. The producer who fails to recognize this fact might just as well change his profession first as last—C. B. Goodenham, Dominion Apiarist.

He had been a witness before the royal commission on banking and currency at Saskatoon and consequently declined to comment on the commission beyond an expression of admiration for the manner in which Canadian banks have met the economic crisis and his opinion that the personnel of the royal commission was a complete guarantee its report would be constructive.

### Problems of Dairymen

Want Eastern Canada To Export Fair Amount Of Butter

Working through the National Dairy Council, the three prairie provinces have made united efforts to induce manufacturers in eastern Canada to export a fair quota of butter. That effort started right after a Canadian butter surplus of 9,000,000 pounds was announced August 1. To this date the western provinces have received no indication that any butter would be shipped to the old country from the east, according to P. E. Reed, Saskatchewan Dairy Commissioner and Secretary of the Western Dairy Association.

Mr. Reed said Saskatchewan had shipped slightly more than 1,000,000 pounds to the market over the last business, he declared was done at a net loss, the loss being heavier in the earlier shipments than the later ones in result of better prices obtaining in England.

### Model Of Tower Bridge

London's Famous Structure Reproduced By Farmer With Crude Tools

A model of London's famous Tower Bridge, eight feet long, two feet high and 14 inches wide, has been made from wooden blocks by a farmer or cigar variety by R. O. Broomhead, farmer of Lyden, Saskatchewan.

It took two winters of steady application to the job and three-and-one-half weeks to paint it.

The tools were a small plane, jack-knife, razor blades, fret saw, scrap glass and sandpaper. Gopher tools were used for paint brushes.

Although he has never seen the structure he set to work and built it for his son. He has not seen the bridge, as it stands in London, either.

### A Strange Plant

Bursts Into Life After Sleeping For Ten Years

Horticulturists were surprised and puzzled recently at the behavior of a South African "Cycas" plant, which suddenly burst into life after lying dormant in the Royal Botanical Gardens in London, England, after sleeping for 10 years.

The plant was found in the South African section of the Wembley exhibition in 1923. It was then a stock and was taken to the botanical gardens, where it slept until last March when suddenly leaves sprouted from the trunk and within a week or two it was covered with beautiful foliage.

Dogs are the most affectionate of animals—the only animals that prefer the company of man to their own kind. Cats can't be trusted a second.

Call: "Good morning, Mrs. Smith. I believe you sent for a locksmith?" Mrs. Smith: "Yes, I did. I sent for the key of the tin of sardines."

W. N. II. 217

### Consumer Wants Good Honey

Demands Same High Standard As In Other Foods

In the case of a food product the producer owes to the consumer extreme care in preparation of the product for the market to see that it is wholesome, clean, attractively packed and equal to the standards under which it is advertised and labelled. The honey producer had things very much his own way until a few years ago because demand exceeded supply and honey sold quite readily without too much fussing around with it. Today, however, conditions are somewhat different and honey is being produced, competition has become keener and the consuming public has become more discriminating in its choice. The consumer has been educated to buy goods graded to definite and uniform standards and is demanding similar standards for honey and these demands cannot be ignored. The consumer is willing to pay for quality produce and as he has the final say as to what he shall buy, his wants must be considered. The producer who fails to recognize this fact might just as well change his profession first as last—C. B. Goodenham, Dominion Apiarist.

To this date the western provinces have received no indication that any butter would be shipped to the old country from the east, according to P. E. Reed, Saskatchewan Dairy Commissioner and Secretary of the Western Dairy Association.

Mr. Reed said Saskatchewan had shipped slightly more than 1,000,000 pounds to the market over the last business, he declared was done at a net loss, the loss being heavier in the earlier shipments than the later ones in result of better prices obtaining in England.

Working through the National Dairy Council, the three prairie provinces have made united efforts to induce manufacturers in eastern Canada to export a fair quota of butter. That effort started right after a Canadian butter surplus of 9,000,000 pounds was announced August 1. To this date the western provinces have received no indication that any butter would be shipped to the old country from the east, according to P. E. Reed, Saskatchewan Dairy Commissioner and Secretary of the Western Dairy Association.

"Did I ever tell you, dear, about when I broke my shoulder straps?"—The Humorist, London.

### Murder Was Disappointed

Valuable Toboggan Team Is Lost By Indian

Rod Garrick, Swampy Cree Indian, of the Hudson Bay Railway country, up near Stewart Lake, is disappointed. He counted on having a knockout fight this winter, but the animals are all dead.

Rod was on the hunt this spring when he came across a timber wolf and six pups. The pups were dandies. Three were black, and three were all white. They were good looking animals, even as pups. Rod got them into camp, and penned them, figuring on training them from puppyhood, and so have a smart dog team.

He went away on a trip. The wolves did not take to the food supplied them. When he returned, he found five dead. He picked up the sixth. It passed away in his arms.

### Tenants Had To Use Ladders

Burglars Stole Staircase From Apartment House In France

Not even staircases are safe from the twentieth century Parisian burglar. Tenants living on the third floor of a French apartment house got up to go to work one morning and found they couldn't go. There was no staircase. It had been removed in the night by burglars.

Telephones and windows had been left intact, however, and while some shouted across the street to their incredulous neighbors others telephoned the medical police, who eventually called out the fire department. Third floor dwellers had to use ladders for the next two weeks while new stairs were being installed.

Alberta Editors To Meet

Alberta division of the Canadian Weekly Newspapers Association will hold its annual convention in Edmonton October 20 and 21. It is announced following an executive meeting here.

Aeroplanes are delivering supplies to ice-bound lighthouses near Warnemunde, Germany.

Some strange kinds of caterpillars can live under water.

### Makes Gift-Giving Easy

Indian Ruler Seeks Gift Of His Favourite Subjects

If you wish to present a gift to the twenty-one-year-old Maharajah of Travancore, India, he will supply it for you. He recently decreed this. According to Hindu traditions, when a young man goes to pay his respects to his ruler he must offer a gift of either silk or silver or gold, and the gift must be according to his station in life. The personal fortunes of many nobles are based on the station of their ruler. The Maharajah of Travancore realized the injustice of this practice, and now, if you go to present your annual obeisance to the ruler, he will find at the entrance gate a man in attendance who will give you a roll of silk or a few gold sovereigns which you present to the ruler. He accepts these, and his secretary takes them back to the guardian at the gate for the next visitor.

Preventive medicine is still one of the most ticklish problems of science, and all attempts to do so in England, the most ticklish is in connection with the examination of the imperial standard yard and pound and the official copies of them. This is a job that has to be done, by statute, every ten years at the National Physical Laboratory at Teddington. The scales, for comparing the pounds, have been specially designed and built by the Laboratory. They live in a nice cool vault which was once the wine cellar of King William IV. The scales have five centrets, three of which are merely designed so as to meet the load, small as it is, taken to gradually avoid any risk of jarring the beam. These centrets are worked by levers projecting through the door of the vault, so that there shall be less chance of inaccurate arising through the near presence of a moving body, air disturbance, or any such unpleasantness.

The pounds are cylindrical lumps of pure platinum, surprisingly small—unless you fully appreciate what a small thing they are. They are about two inches high, and of the same diameter as a half-crown. The intrinsic value of the metal in each is worth about £100.

And the new scales weigh to an accuracy of one part in one hundred million.

The yards cannot be measured quite so accurately as the pounds can be weighed, but they are measured to one ten-thousandth part of a millimetre.

The standard yard is a bronze rod of "Gilt" metal, the late Mr. Bailey, who invented this particular bronze alloy. Holes are sunk at each end of the rod, and at the bottom of each hole is a small gold plug with three straight scratches across it. The distance between the centre scratches is one yard. That is the only inch and complete definition of a yard, and ultimately of all our units of length.

The most interesting scientific fact that has been established by these measurements is that plain metal is more stable, in size, than an alloy. An alloy, containing a large proportion of a harder metal, has been used as a modern copy, and for the past thirty years this yard has been growing as small as a new whole thousandth of a millimetre larger than the standard yard.

Of course, it may be that the standard yard and its older copies are a shrinking. Well, that does not matter, for it is the old yard that is a yard whatever happens.

An Economic Garden

Includes Different Plants From All Parts Of World

An economic plant bed is being established in Boston's public garden. It is composed of 24 different plants from all parts of the world which provide man with needs from Panama to the Arctic.

Plants selected for the bed included: Black pepper, peanuts, pineapple, ginger plant, neem, silk oak, vanilla, ramie, flax, sugar cane, cashew tree, raspberry, Mexican cane, rice, foxglove, tobacco, stonewall screw pine, Malay candle nut, alligator pear, Malay apple, alone, hasting hemp, date palm, camphor tree, coffee plant, thatch palm, cotton plant, fan palm and banana tree.

## Keeping Standard Measurements Is One Of The Most Difficult Problems Confronting Scientists

### Preventive Medicine

Mental Health Is Just As Important As Physical Health

Preventive medicine is as concerned with mental as physical health. Dr. A. Grant Fleming, of the Department of Public Health and Preventive Medicine, McGill University, told the annual convention of the Alberta Medical Association at Calgary.

"There are more beds in our mental hospitals than in our general hospitals," he said. "The number of people who live unhappy lives because they are not mentally happy is large."

Dr. Fleming declared progress in the field of preventive medicine awaits the development of the science of medicine. "If the medical profession is to take part it must be prepared to act as a group. In addition to local organization taking its part in public health, the profession must provincially and nationally define the field it would assume in the realm of preventive medicine."

Dr. Fleming referred to improvement of health of infants, to schools and industries regarding the prevention of health and establishing their own medical departments. The private practitioner has had little part in this development, he said. Preventive medicine should be given by the family physician who should assume responsibility for smallpox vaccination and diphtheria immunization.

Preventive medicine enters into this problem because it has sufficient knowledge to justify a program of preventive mental disease. The promotion of mental health. The physician must study the mental field," he declared.

### Nutritive Value The Same

Frozen Meat As Good As Fresh

Research Committee Reports

Frozen meat is as good as fresh meat, according to the research committee of the Royal Agricultural Society of England. The committee has reported having inquired of the department of scientific and industrial research regarding the relative nutritive value of fresh meat as compared with tinned, chilled or frozen meat.

A reply had been received from the Ministry of health stating that on the knowledge at present available there is no recognizable difference in nutritive value between frozen and chilled and fresh meat of similar quality. Further, there was no evidence that modern methods of canning affected the nutritive value to any greater extent than ordinary cooking.

Decorated By King

While the royal train was speeding from Aberdeen to Bilsland, Scotland, recently, King George presented the M.V.O. to William Johnston, chief superintendent of the North Scottish district, who was retiring after 52 years of railway service.

Traffic receipts of England's four railways last year totalled \$828,001,990.

Now we've turned the corner again we haven't found what's around it.

### BABY SUBMARINE TO SEEK LUSITANIA'S TREASURE

Using his 22-foot submarine, "Ragwort," Simon Lake, famous inventor of underwater craft, hopes to succeed in a forthcoming attempt to reach the wreck of the liner "Lusitania," in her ocean grave off the Irish coast, where she was torpedoed in 1916. The diminutive submarine attained a depth of 300 feet in initial tests in Long Island Sound recently and as the sunken liner lies in only 200 feet of water, it is reasonable to concede the Lake expedition an excellent chance of succeeding in the venture. The strong iron of the liner is said to contain about \$1,000,000 in gold and silver, as well as a large quantity of precious stones and other jewelry.

While the royal train was speeding from Aberdeen to Bilsland, Scotland, recently, King George presented the M.V.O. to William Johnston, chief superintendent of the North Scottish district, who was retiring after 52 years of railway service.

## FARM CREDIT CORPORATION NEEDED FOR WEST

Ottawa, Ont.—The setting up of an agricultural credit corporation which would operate on a non-profit basis is suggested in a brief presented to the royal commission on banking by a special western interprovincial committee appointed by premiers of the three prairie provinces.

The capital structure of this corporation would be made up by Dominion and provincial governments, together with some contribution from the borrower. Credit from the bank would be made available at the lowest cost as a matter of public policy.

The Dominion government should adopt measures designed to raise the level of agricultural prices "to a point which would restore the farm income," the committee suggests. International co-operation to that end should be undertaken. Also, some solution of the debt problem in western Canada must be found. The committee is of the opinion that the farmer is not to be driven from the farms. With this in view the committee suggests amendments to the Bankruptcy Act, "so as to provide facilities by which insolvent farmer debtors may secure cheaply and quickly a composition or extension of their debts, secured and unsecured, which will be binding on all their creditors when approved by the appropriate court."

It is also suggested that, in cases where bankruptcy proceedings can be avoided, power be given to the debt adjuster to make use of the respective provisions of the companies and adjustments of farm debts.

Evidence submitted to the commission indicated "widespread dissatisfaction" with regard to interest charges made by the banks and also their practice of making loans repayable in three months, the committee states. The banks should be urged, it is suggested, "to make borrowers on terms of repayment likely to coincide with the realization from the venture for which the money was borrowed."

The committee suggests that the banks cannot charge a rate of interest in excess of the bank rate and impose penalties if such is done. Another suggestion embodied in the brief is that the banks be empowered and encouraged to lend to farmers on the security of threshed grain on the farm. If necessary, mortgages to the bank should be permitted this should be introduced. The risks of fire and theft, it is stated, be covered by insurance so that the bank will have maximum security on the grain.

The committee urges that loans for unemployment and depression should be made available at a rate not exceeding one per cent. over the discount rate of the finance department.

Dealing with the question of exchange the brief asserts that the prairie governments should pay \$5,400,000 in exchange premiums on their bonded debts during the past two and a half years. It is estimated that 60 per cent. of the total was collected by Canadian holders of the bonds.

"We suggest that steps should be taken to prevent Canadian bondholders from demanding payment in other than Canadian funds, and that the buying and selling of foreign exchange be under the control of a central bank," the submission concludes.

### Record Price For Beef

Springfield, Mass.—A new record price for beef steak on the hoof was paid at the baby beef auction at the Eastern States exposition, when the grand champion owned by Theresa Grass, of Pine Plains, N.Y., brought \$11.15 per pound at auction. This compares with a previous record of \$8.30 paid at the East St. Louis fair last year.

### Blame For Reichstag Blaze

London, Eng.—An international legal commission which has been holding an inquiry into the Berlin Reichstag fire last February, found that grave grounds existed for suspecting that the building was set afire by the Nazis rather than by the Communists whom the German government has accused.

### Studying Tax Problems

Winnipeg, Man.—J. A. Byng, commissioner of income taxation for Saskatchewan, was in Winnipeg to consult with D. C. Stewart, Manitoba administrator of income taxation, concerning means of eliminating overlapping taxation as respects individuals subject to taxation in both provinces.

W. N. U. 10/13

### Favors Tariff Cut

Controlled Inflation And Lower Tariffs Favored By U.S. Official  
Chicago—Secretary of Agriculture Henry Wallace told the United States Grain Dealers' Association that he still favors controlled inflation.

Along with this he criticized high tariff psychology and warned that attempts to fix prices "without control of production is a sure road to failure." Most of the price rises are also inflationary," he said. "If the purchasing power of farm products does not improve during the next few months, the price rises and inflationary will have great power in congress this winter and there will be passed legislation which will make the Agricultural Adjustment Act seem extraordinarily conservative."

Secretary Wallace said he looked for decidedly higher agricultural prices within a few months, but that he felt the improvement might come to a stand if "we are not prepared to meet the peril produced by the following forces." He said these were: "First, America is a creditor nation to the tune of \$1,000,000,000 annually, but as a nation, she has a surplus psychology. Second, the American people are still essentially high tariff in their attitude. Third, the American people are dissatisfied about lending money abroad, and it will be difficult to float foreign loans in their present temper."

Secretary Wallace said that for the time being our people are profoundly nationalistic, and that as long as they are operating on this basis, we should not expect the part of the agricultural adjustment administration year after year to keep down our acreage to a point which will afford a living price to American farmers."

### Empire News

#### Clearing House For Empire News Is Suggested

Toronto, Ont.—National press associations in each of the Dominions, freely exchanging news of the empire, were held up as a prospect to hope for in a committee of the British Commonwealth Relations Conference, which met in London, England, last week. Australia and India could set up cooperative associations as in Canada and New Zealand, the road would be prepared for the establishment in London of a clearing-house for this empire news, in which the press of the United Kingdom would be invited to participate.

### Kitsilano Boys' Band

Have Accepted Invitation To Play At Crystal Palace, London  
Vancouver, B.C.—Kitsilano Boys' Band, which won honors across the continent, has accepted an invitation to play next summer in the Crystal Palace, London, England, according to the band's calendar for 1934.

This young men's band took the Pacific northwest and British Columbia honors in 1931-32-33, the Canadian championship at the Canadian National exhibition in 1932 and the world's championship in their class at a Century of Progress Fair in Chicago recently.

### Warning Is Given

#### Heavy Penalty For Melting Down Gold Coins

Ottawa, Ont.—A warning to those who might be tempted to melt down gold coin in order to secure the high price now prevailing for the raw metal, is contained in a statement issued by the Department of Finance.

Section 25 of the Currency Act provides that the penalty for illegal melting of such gold coin shall be a fine not exceeding \$250, or imprisonment for not more than 12 months, or both fine and imprisonment.

#### American Section At Geneva

Geneva, Switzerland.—The American Minister to Switzerland, Hugh R. Wilson, practically lived in Geneva, and with two members of the consular staff headed by Premiers B. Gilbert, devoted themselves exclusively to League of Nations questions, the league decided to inaugurate a special American section.

#### Belief Crops

Edmonton, Alberta.—Officials of the Department of Defence at Ottawa are conferring with Alberta government officials on the question of eliminating tobacco relief claim in this province, to be under the defence department's supervision.

### No More Free Gas

Say Joy Riders From Alberta Obtaining Free Gas From B.C.

Victoria, B.C.—Joy riders from Alberta have been obtaining free gasoline in British Columbia, according to Hon. W. M. Dennis, British Columbia Minister of Labour, returned from a trip to the Okanagan and Kootenay districts.

Mr. Dennis said families were driving across the inter-provincial line in old cars and asking for free meals and a supply of gas to move onward. Most municipal officials found it cheaper to speed them on their way with gas instead of harboring them. The minister said word apparently spread to the prairies and increased the flow of ancient cars from Alberta into the southern section of the province.

Mr. Dennis issued orders no more free gas be supplied to prairie titmice.

### Growth Of Empire Trade

#### Exports For August Of Very Encouraging Nature

Ottawa, Ont.—Exports to British Empire countries in August, exclusive of those to the United Kingdom, totalled in value \$4,074,000. This was an increase of \$622,000 over August last year and the highest since November, 1931, when the total was \$4,372,097, according to the Dominion Bureau of Statistics.

The largest export last month was to Australia, valued at \$966,000, an increase of \$101,000, in which number from British Columbia played a conspicuous part.

Exports to the Irish Free State, Newfoundland, Bermuda, the British West Indies, the British countries of Africa, British Guiana, Hong Kong, Palestine and British Oceania, all showed gains last month.

## WIDER POWERS FOR DOLLFUSS ARE INDICATED

Vienna.—It was authoritatively announced that Chancellor Dollfuss was taking over complete executive control of Austrian affairs, including the army, the police and the gendarmerie in a new "cabinet of personalities." It was explained the new Dollfuss cabinet will be formed on the basis of elimination of all political parties. Cabinet members who belong to parties will be abolished, and parliament will lay down mandates.

It was not as yet definitely disclosed whether the Dollfuss cabinet will remain a part of the political picture. A new cabinet list, however, was expected.

Shortly after the announcement a Christian-Social meeting under the chairmanship of Karl Vauguin, minister of the army, and an ironic coincidence—Princess Starhemberg, mother of the Heimwehr leader, wound up by issuing a communique to the effect that the party was solid behind Dollfuss and "the Christian corporate authority state."

This young men's band took the Pacific northwest and British Columbia honors in 1931-32-33, the Canadian championship at the Canadian National exhibition in 1932 and the world's championship in their class at a Century of Progress Fair in Chicago recently.

### CABINET TROUBLE MAY UPSET DOLLFUSS

Vienna, Austria.—The Dollfuss cabinet is expected to be reshuffled, according to reports from Vienna.

Princess Starhemberg, mother of the Heimwehr leader, wound up by issuing a communique to the effect that the party was solid behind Dollfuss and "the Christian corporate authority state."

This young men's band took the Pacific northwest and British Columbia honors in 1931-32-33, the Canadian championship at the Canadian National exhibition in 1932 and the world's championship in their class at a Century of Progress Fair in Chicago recently.

#### American Section At Geneva

Geneva, Switzerland.—The American Minister to Switzerland, Hugh R. Wilson, practically lived in Geneva, and with two members of the consular staff headed by Premiers B. Gilbert, devoted themselves exclusively to League of Nations questions, the league decided to inaugurate a special American section.

#### Belief Crops

Edmonton, Alberta.—Officials of the Department of Defence at Ottawa are conferring with Alberta government officials on the question of eliminating tobacco relief claim in this province, to be under the defence department's supervision.

### NEW DEPUTY MINISTER

Dr. R. E. Woodhouse, Executive Secretary of the Canadian Tuberculosis Association, who has just been appointed Deputy Minister of Pensions and National Health for the Dominion.

Dr. R. E. Woodhouse, Executive Secretary of the Canadian Tuberculosis Association, who has just been appointed Deputy Minister of Pensions and National Health for the Dominion.

Dr. R. E. Woodhouse, Executive Secretary of the Canadian Tuberculosis Association, who has just been appointed Deputy Minister of Pensions and National Health for the Dominion.

Dr. R. E. Woodhouse, Executive Secretary of the Canadian Tuberculosis Association, who has just been appointed Deputy Minister of Pensions and National Health for the Dominion.

### Northern Air Route

#### Winnipeg Expected To Be In Important Position In Trans-Atlantic Service

Ottawa, Ont.—While it is too soon to predict the role that Winnipeg will play, it is learned here on official authority that negotiations for a trans-Atlantic air service are now rapidly reaching a final stage. The three countries that will co-operate in this venture are the United States, Canada and Britain.

The negotiations are now proceeding at London, where the Canadian government and, probably, the Canadian Airways, are represented. The United States participant is the Pan-American Airways, Limited, and the British negotiator is the British Airways.

An announcement of the plans for an early trans-Atlantic service is expected within six weeks.

It is not known here if the plans will call for a branch line from Chicago to Winnipeg and thence northward to tap the main line, but it is said that this possibility is being considered.

### Railway Fares

Scaling Down In Prices Seen, And Excursions May Be Permanent Plan

Calgary, Alberta.—Humored consideration of a scaling down of railway fares in the United States is subject to close observation by Canadian railway executives. E. W. Beatty, president of the Canadian Pacific Railway, said here.

"The question of lower fares is a matter of development and depends on future traffic," Mr. Beatty said. "But I believe, judging by the manner in which they have been patronized in the past few months, excursions have come to stay."

#### Boy Takes Long Journey

Edmonton, Alberta.—Adopted by his aunt and uncle, Mr. and Mrs. A. B. Houghton, eight-year-old Walter Houghton, travelled alone from Cape Town, South Africa, to the Alberta capital after his mother and father had died. The boy said he enjoyed the 13,800 mile trip and is eager to see his first snowfall.

### Study Cosmic Rays

U.S. Army "Plane Carries Instruments Four Miles Above Earth"

Riverdale, California.—Using army bombing planes to carry their sensitive instruments nearly four miles above the earth, Dr. Robert Millikan, noted Pasadena scientist, and his assistant, Dr. Victor Neher, have resumed their efforts to learn more about the cosmic rays.

An army pilot, garbed in 25 pounds of winter flying clothes and equipped with oxygen breathing facilities which he is compelled to use about 15,000 feet, flew the instruments to 16,000 feet recently.

The plane remained at that altitude an hour and 15 minutes and at 15,000 feet for a similar period. Dr. Neher said he plans several flights daily for two weeks.

Similar tests were conducted on behalf of Dr. Millikan in Northern Manitoba in 1932. On that occasion a Royal Canadian Air Force plane made altitude flights after being fitted out as an aerial-laboratory.

### Find Free Gold

#### Ore Body Is Discovered In Stevenson Lake Area

The Pas, Man.—Predictions made last year that the next big gold find would be recorded at Oxford Lake and vicinity have been borne out by a number of strikes in the Stevenson Lake area about midway between Oxford Lake and Island Lake, according to word received here.

On one side are James R. Criderman, of the Criderman mines, Central Manitoba, and well known in Ontario and Quebec.

Free gold is scattered over a wide area. Assays run up to \$120 per ton. Claims extend three miles along Stevenson Lake shore.

### Bernt Balchen In Hospital

#### Nationality Has Operation For Appendicitis

Cape Town, Union of South Africa.—Bernt Balchen, the noted flyer, well known in Canada, underwent an appendicectomy operation described as completely successful.

The mystery of his whereabouts which caused Sir Hubert Wilkins and his shipmates some hours of inquiry, was cleared up by a statement that when he left the ship he met a friend taking dinner at a hotel. It explained he spent the evening in his friend's company and returned shortly before midnight, going to bed quite ignorant of the excitement by his "disappearance."

## FOUR NATIONS MAY AGREE ON ARMS CONTROL

#### May Recall Film Stars

London, Eng.—Broadly outlined, the aims of the British government on the disarmament question are understood to be the application of the principle of armaments limitation on all nations and the avoidance of new competition in armaments.

The new British cabinet reviewed the situation and heard the report of Captain Anthony Eden, under-secretary for Foreign Affairs. The new British cabinet reviewed the situation and heard the report of Captain Anthony Eden, under-secretary for Foreign Affairs. The new British cabinet reviewed the situation and heard the report of Captain Anthony Eden, under-secretary for Foreign Affairs.

Paris, France.—A united disarmament front of Great Britain, United States, France and Italy, based on the French plan for armaments control, was believed by French officials to be near.

While British quarters were reticent pending the outcome of a cabinet meeting in London, French officials maintained the points of view of the four powers were close enough to be entered an accord. This it was believed, would include the control which sanctions against any nation violating a disarmament agreement, and limitations of armaments and guns.

### Would Force Work

#### Big Reconstruction Project Advocated In Winnipeg

Winnipeg, Man.—A city home reconstruction project, which would provide work for thousands of Winnipeg building tradesmen, is advocated by the civic town planning and zoning board and the Winnipeg building trade council.

The project was discussed at a conference here, and under the plan the Dominion and provincial governments would be asked to finance a scheme for remodeling old run-down homes in some of the poorer districts of Winnipeg.

## TENSION HIGH AT OPENING OF LEAGUE PARLEY

Geneva, Switzerland.—The state of political tension existing in Europe about the coming of the League of Nations assembly was exemplified as Swiss detectives from many cities began mobilizing to reinforce Geneva police on the eve of the League of Nations assembly and council meetings and the disarmament conference.

The purpose was said to be primarily to protect the lives of German delegates.

Opening of the conference begins a period of intense activity in the league, that the very peace of Europe is the stake of negotiations about to commence was the consensus of opinion.

On one side are France and allied nations apparently ready to limit but not to reduce armaments, at least prior to the opening of the period of rigid control of existing armaments which France has proposed.

On the other side is what is called an awakened, fiercely nationalized, Hitlerized Germany, seemingly determined to insist on eventual equality of armaments and emancipation from the military restrictions of the treaty of Versailles.

A visit of Conference President Arthur Henderson to Berlin was considered to have been influential in an optimistic swing of prospects toward disarmament. Germany was understood to be ready to accept non-recourse-to-force provisions, subscribe to the definition of aggression determined by the league, accept league supervision and control of armaments with penalties for violations.

### Canada's New Loan

#### Will Be Laid Out For Refunding Maturing Bonds

Ottawa, Ont.—The new government loan will be "substantially less than \$250,000,000," according to a high official of the finance department. It will be "essentially a refunding loan and a modest financial transaction in every sense of the word," the official added.

The date and interest rate of the new issue has not yet been fixed. Officials are confident the public will take a bank loan of some \$250,000,000 maturing at the same time. The total issue will be only slightly in excess of these requirements.

#### The Loan Is chiefly for the purpose of refunding the \$160,000,000 worth of victory bonds maturing on November 1 and a bank loan of some \$250,000,000 maturing at the same time.

The total issue will be only slightly in excess of these requirements.

### May Recall Film Stars

#### German Members Of Hollywood May Have To Return Germany

Hollywood, Cal.—German members of the film colony regarded with concern a report from Berlin that a move would be made to require their return to the fatherland to participate in "cultural reform" of the nation.

Marlene Dietrich, Dorothea Weck, Ernst Lubitsch and many other Hollywood celebrities would be affected by the order now being discussed by the Film Reichsausschuss, the controlling motion picture organization there, and said to be favored by Adolf Hitler.

#### Morphine Case

Victoria, B.C.—Sacks of dried poppy heads were stacked in the court room as material evidence in the trial of a Hindu named Bern on a charge of possessing morphine tapers. Royal Canadian Mounted Police recently seized a truckload of poppy heads from a city and Stanley heads and this was the first case arising out of the seizure. The case was adjourned.

#### Made Dangerous Trip

Edmonton, Alberta.—Four Edmonton youths have completed the treacherous 250-mile cross trip down the Saskatchewan River and tributaries from Rocky Mountain House to this city. The dangerous waters up and down the river have kept the youths from city and Stanley heads and this was the first case arising out of the seizure. The case was adjourned.

#### B.C. Lumber Export

Vancouver, B.C.—Export of about five million of lumber from British Columbia in August set a new high record, according to figures issued by the Pacific lumber inspection bureau. The figure was \$75,629,000 for August, 1933, the highest previous month. In August, 1932, the export only totalled 27,400,000 feet.

| 7                    | ..... | 4 "         | 5-6           | ..... | 3 2739 A.F.   |
|                      |       |             | 13.03 Acres.  |       |               |

Each parcel will be offered for sale subject to a reserve bid, and subject to the reservations contained in the existing certificate of title. Terms, cash.

Redemption may be effected at any time prior to the sale, by the payment of all arrears and costs.

Dated at Champion, Alberta, this 24th day of August, 1933.

HERBERT COOPER,  
 Secretary-Treasurer.

## Local & General

Mr. and Mrs. O. Castator and Mrs. J. Castator were Calgary visitors this week.

The Ladies' Aid met on Thursday at Mrs. Latiff's home. A good attendance were present and arrangements to hold a bazaar in the near future were made.

Don't forget the W.I. bazaar sale and tea to be held in Mr. Alexander's office Sat. September 30th. All donations greatly appreciated.

Divine service will be held at Yetwood October 6th at 8 o'clock. Rev. Peter Dawson will conduct the service.

Communion services will be held at Blusson and Champion on Sunday October 8th Thanksgiving day.

The Minister of Agriculture for Alberta has announced arrangements completed for free shipments of feed, etc. for necessary farm stock, to areas concerned. Is Champion district included in these areas? If not, why.

Mr. and Mrs. Irl Ditto and family took up residence in their town home on Tuesday.

F. Smith's house in the subdivision is in the hands of the painter this week.

Inspector Krispo visited several rural schools in the Champion district this week.

## Attention

Coming—Hopkins Old Time Orchestra of Calgary, Friday, October 13.  
 (Sponsored by the Champion B.P.O. Elks)

Mrs. O. Harper entertained on Tuesday, September 19, in honor of Vera Ruby's first birthday. The guests present included Mr. and Mrs. Hammond Cammangay, Mr. and Mrs. Gordon Collins California and Mrs. Clever and Mrs. McIntyre of Champion.

The Amity Club met Friday at the home of Mrs. J. W. Cain. During the afternoon a moment's silence was observed, in respect to their deceased member, Mrs. H. Higgins. The hostess was assisted in serving by Mrs. Ed. Carlson and Miss M. Carlson.

Mr. John Henderson of Lethbridge, father of J. D. Henderson, left Tuesday for Vancouver, where he will reside in the future.

Mrs. D. D. Farmer was successful in winning the radio given away by the Latiff Grocceteria in a recent contest. The contest consisted of guessing the number of candies contained in a glass jar. Mrs. Farmer's guess was 420, which was the correct number.

At a meeting held recently in Champion it was decided to hold a Field Meet in Champion for local competition, and a Field Day at Cammangay which will be open for competition from neighboring towns. The dates will be announced later.

J. Doyle threshed 1500 bushels of wheat on 80 acres, making an average of approximately 18 1/2 bushels. This wheat would be a good one. Another field of 110 acres averaged 10 bushels to the acre.

The next regular meeting of the O.O.R.P., Champion Lodge No. 33, will be held in the lodge rooms on Tuesday evening, October 3, at 8:30 p.m. A good attendance is requested.

MARGARET McRAB,  
 Secretary, protem.

An invitation has been issued by the Vulcan Masonic Lodge to the Champion Masons and their wives to attend an At Home to be held in Vulcan on Tuesday evening.

Mr. and Mrs. Joe Turland of Lethbridge were in town on Tuesday; while here they gave eight permanent. Mr. and Mrs. Turland will return to Champion in two weeks and anyone interested in a permanent, can secure particulars from Mrs. W. A. McIntyre.
